General Manager
Cobar Shire Council
PO Box 223
COBAR NSW 2835

Dear Sir/Madam

Subject: Lake Macquarie City Council requests your support for the Everybody's Home Campaign

At its meeting of 23 April, Lake Macquarie City Council resolved to support the Everybody's Home campaign. In particular, Council resolved to write to all NSW councils asking them to support the campaign, and to advise the administrators of the Everybody's Home campaign of Council's support.

The Everybody's Home campaign aims to help the one in nine households at risk of homelessness, due to the cost of housing.

On behalf of Lake Macquarie City Council, I invite you to join us in supporting this national campaign. If you would like to discuss Council's position, please don't hesitate to contact Alice Howe, Council's Manager Sustainability on 4921 0337. For more information on the Everybody's Home campaign, please go to everybodyshome.com.au.

Yours sincerely

Morven Cameron
Chief Executive Officer

Dear Cr Brady

FAR WEST JOINT ORGANISATION

I write seeking the support of your Council for Coonamble to be a potential member of the Far West Joint Organisation (JO) that would presumably consist of Bourke, Walgett, Cobar and, eventually, Brewarrina.

As you are aware I raised the issue prior to Christmas and again in Bourke at the RFS consultation meeting in January 2018.

Coonamble Shire believes its future lies with the western councils as there is an affinity with this group. Council also believes that as an association or JO each council can maintain its identity and achieve results based on the natural geographic area and functional economic similarity of the above LGAs.

It is plainly obvious that Council does not "fit" with the Eastern Council Block that will form an ORANA Joint Organisation regardless of an artificial line drawn on a map to suit NSW Government planning zones. The functionality of these zones simply does not work for councils misaligned, as is the case with Coonamble Shire.

I ask that you support the acceptance of Coonamble Shire as a member of the Far West Joint Organisation, should the Office of Local Government consider it a feasible option.

Yours faithfully

Michael Webb
Mayor

Under the *Local Government Act 1993* Division 2, s.36 (3)

A plan of management for community land must identify the following:

- (a) the category of the land,
- (b) the objectives and performance targets of the plan with respect to the land,
- (c) the means by which the council proposes to achieve the plan's objectives and performance targets,
- (d) the manner in which the council proposes to assess its performance with respect to the plan's objectives and performance targets, and may require the prior approval of the council to the carrying out of any specified activity on the land.

The initial Category choices are

Category	Sub Category	Objectives (LG Act)	Guidelines
Natural Area	Bushland, wetland, escarpment, watercourse, foreshore or a category prescribed by the regulations	<p>The core objectives for management of community land categorised as a natural area are:</p> <ul style="list-style-type: none"> a) to conserve biodiversity and maintain ecosystem function in respect of the land, or the feature or habitat in respect of which the land is categorised as a natural area, and b) to maintain the land, or that feature or habitat, in its natural state and setting, and c) to provide for the restoration and regeneration of the land, and d) to provide for community use of and access to the land in such a manner as will minimise and mitigate any disturbance caused by human intrusion, and e) to assist in and facilitate the implementation of any provisions restricting the use and management of the land that are set out in a recovery plan or threat abatement plan prepared under the <i>Threatened Species Conservation Act 1995</i> or the <i>Fisheries Management Act 1994</i>. 	The land, whether or not in an undisturbed state, possesses a significant geological feature, geomorphological feature, landform, representative system or other natural feature or attribute that would be sufficient to further categorise the land as bushland, wetland, escarpment, watercourse or foreshore under section 36 (5) of the Act.

Sportsground		<p>The core objectives for management of community land categorised as a sportsground are:</p> <ul style="list-style-type: none"> a) to encourage, promote and facilitate recreational pursuits in the community involving organised and informal sporting activities and games, and b) to ensure that such activities are managed having regard to any adverse impact on nearby residences. 	<p>The land is used or proposed to be used primarily for active recreation involving organised sports or the playing of outdoor games.</p>
Park		<p>The core objectives for management of community land categorised as a park are:</p> <ul style="list-style-type: none"> a) to encourage, promote and facilitate recreational, cultural, social and educational pastimes and activities, and b) to provide for passive recreational activities or pastimes and for the casual playing of games, and c) to improve the land in such a way as to promote and facilitate its use to achieve the other core objectives for its management. 	<p>The land is, or is proposed to be, improved by landscaping, gardens or the provision of non-sporting equipment and facilities, for use mainly for passive or active recreational, social, educational and cultural pursuits that do not unduly intrude on the peaceful enjoyment of the land by others.</p>
Area of cultural significance		<ul style="list-style-type: none"> 1) The core objectives for management of community land categorised as an area of cultural significance are to retain and enhance the cultural significance of the area (namely its Aboriginal, aesthetic, archaeological, historical, technical or research or social significance) for past, present or future generations by the active use of conservation methods. 2) Those conservation methods may include any or all of the following methods: <ul style="list-style-type: none"> a) the continuous protective care and maintenance of the physical material of the land or of the context and setting of the area of cultural significance, 	<p>The land is:</p> <ul style="list-style-type: none"> a) an area of Aboriginal significance, because the land: <ul style="list-style-type: none"> i. has been declared an Aboriginal place under section 84 of the National Parks and Wildlife Act 1974, or ii. whether or not in an undisturbed state, is significant to Aboriginal people in terms of their traditional or contemporary cultures, or iii. is of significance or interest because of Aboriginal associations, or

		<p>b) the restoration of the land, that is, the returning of the existing physical material of the land to a known earlier state by removing accretions or by reassembling existing components without the introduction of new material,</p> <p>c) the reconstruction of the land, that is, the returning of the land as nearly as possible to a known earlier state,</p> <p>d) the adaptive reuse of the land, that is, the enhancement or reinforcement of the cultural significance of the land by the introduction of sympathetic alterations or additions to allow compatible uses (that is, uses that involve no changes to the cultural significance of the physical material of the area, or uses that involve changes that are substantially reversible or changes that require a minimum impact),</p> <p>e) the preservation of the land, that is, the maintenance of the physical material of the land in its existing state and the retardation of deterioration of the land.</p> <p>3) A reference in subsection (2) to land includes a reference to any buildings erected on the land.</p>	<p>iv. displays physical evidence of Aboriginal occupation (for example, items or artefacts such as stone tools, weapons, engraving sites, sacred trees, sharpening grooves or other deposits, and objects or materials that relate to the settlement of the land or place), or</p> <p>v. is associated with Aboriginal stories, or</p> <p>vi. contains heritage items dating after European settlement that help to explain the relationship between Aboriginal people and later settlers, or</p> <p>b) an area of aesthetic significance, by virtue of:</p> <p>i. having strong visual or sensory appeal or cohesion, or</p> <p>ii. including a significant landmark, or</p> <p>iii. having creative or technical qualities, such as architectural excellence, or</p> <p>c) an area of archaeological significance, because the area contains:</p> <p>i. evidence of past human activity (for example, below-ground features such as building foundations, occupation deposits, features or artefacts or above-ground features such as buildings, works, industrial structures, and relics, whether intact or ruined), or</p> <p>ii. any other deposit, object or material that relates to the settlement of the land, or</p> <p>d) an area of historical significance, because of the importance of an association or position of the land in the evolving pattern of Australian cultural history, or</p> <p>e) an area of technical or research significance, because of the area's contribution to an understanding of Australia's cultural history or environment, or</p>
--	--	--	---

			f) an area of social significance, because of the area's association with Aboriginal life after 1788 or the area's association with a contemporary community for social, spiritual or other reasons.
General community use		<p>The core objectives for management of community land categorised as general community use are to promote encourage and provide for the use of the land, and to provide facilities on the land, to meet the current and future needs of the local community and of the wider public:</p> <p>a) in relation to public recreation and the physical, cultural, social and intellectual welfare or development of individual members of the public, and</p> <p>b) in relation to purposes for which a lease, licence or other estate may be granted in respect of the land (other than the provision of public utilities and works associated with or ancillary to public utilities).</p>	<p>The land:</p> <p>a) may be made available for use for any purpose for which community land may be used, whether by the public at large or by specific sections of the public, and</p> <p>b) is not required to be categorised as a natural area under section 36A, 36B or 36C of the Act and does not satisfy the guidelines under clauses 102–105 for categorisation as a natural area, a sportsground, a park or an area of cultural significance.</p>

**MINUTES OF THE COBAR YOUTH COUNCIL
MEETING HELD IN THE COUNCIL CHAMBERS ON
MONDAY 21 MAY 2018 COMMENCING AT 4:17PM**

PRESENT: Hannah Kriz, Narelle Kriz, Andrew Rorke, Julie Payne, Angela Shepherd, Kelley Harris, Michael Collis, Konnah Sime, Kelly Archer, Matt Botten and Chloe Polack.

APOLOGIES: Andrew Roberts.

MINUTES FROM THE PREVIOUS MEETING

MOTION: That the Minutes of the Meeting held on Monday, 23 April 2018 be accepted as true and correct record of that Meeting.

Hannah Kriz / Andrew Rorke

CARRIED

BUSINESS ARISING FROM MINUTES

- Committee discussed all the details and plans for the Colour Fun Run.
-

GENERAL BUSINESS

- ❖ The Youth Council has had a suggestion of turning the Youthie into an inflatable world during the next school holidays.
- ❖ The Colour Fun Run will go ahead:
 - The start of the colour run was decided to be a 9am arrival and a 9:30am start.
 - The start and finish line of the race is being changed due to the Running on Empty Festival cars that are parking where the run starts and finishes. The choices to be voted on are: on the corner of the Council Depot, in front of the Post Office or on Harcourt Street.
 - The price of the colour run thought about being made online but to be kept the same price as last year.
 - The fire brigade and SES are to be notified of the Colour Fun Run plans.
 - The CYC to start obtaining sponsors for the Colour Fun Run as last year it was minimal.
 - When plans are set, posters are to be made up and placed in: shops, cars, social media, or make it a newspaper ad for the Cobar Weekly.
 - Registration Pack for Colour Run will still be the same but the CYC looked at trying to get online registration happening.
 - Closer to the date, the CYC will sort out who is helping and what they are doing on the day.
- ❖ The CYC looked at running a nachos food stall during the Miner's Ghost Markets:
 - The CYC would need, 2-3 microwaves, added toppings (avo, cheese, etc)
 - The nachos could be pre-made in foam boxes with a checklist that says what toppings go on the nachos.
- ❖ The CYC also looked at getting 1 or 2 inflatables for the Miner's Ghost Festival.
 - The pricing was discussed, whether a wristband is sold and if we include a family deal of \$50.
 - Narelle will get the prices on the inflatables. The CYC will need about \$4,000 - \$5,000 for them.

-
- Instead of using the inflatables that the CYC got for the family day, we are to discuss a variety of inflatables that we could bring in.
 - Bubbling with Energy will provide people for certain inflatables but a roster will be made up where CYC members will need to watch over the inflatables that have no Bubbling with Energy employees.
 - ❖ A working bee afternoon was planned for Friday, 22nd of June:
 - Within this afternoon, member of the Cobar Youth Council were to count the how much colour that is still left over and what is needed for the next colour run.
-

NEXT MEETING

The next meeting for the Cobar Youth Council will be held on Monday, 25 June 2018 at 4:15pm in the Council Chambers.

THERE BEING NO FURTHER BUSINESS THE MEETING CLOSED AT 4.52PM

This report provides a summary of the Water condition and activity for the month of June 2018.

1. Potable Water Supply and Quality

The Council filtered 62,242 kL this month, down from 64,378 kL last year, as shown in the figure below. The plant ran for an average of 11.4 hours/day with an average output of 51 litres/second.

Raw water, with an average turbidity of 6.07 and pH of 7.61, was treated to a finished turbidity of 0.18 and pH of 7.67. The turbidity, pH levels, chlorine and fluoride trends of the million tank reservoir for each day of the month is shown in Appendix A of this document. Each parameter except fluoride was within the critical control point limits and therefore within water quality requirements. The fluoride dosing was non-compliant for the majority of the month. This was caused by the non-availability of the Councils one trained fluoride operator, the other Councils water plant operator will be attending a fluoride training course later in the year.

The microbiology and chemistry laboratory analysis results for the month were within acceptable norms and the raw data for the month shown in Appendix B.

2. Water Faults and Erroneous Readings

a) Customer Complaints

The following complaints for discoloured drinking water, water odour, water main breaks or taste issues were logged with the Council over the month of June:

Water:

Date	Description	Location	Status
07/06/2018	Water Leak	Community Health	Resolved
08/06/2018	Dirty Water	Echidna Street	Resolved
08/06/2018	No Water	Nyngan Road	Resolved
12/06/2018	Water Leak	Yarran Circle	Resolved
19/06/2018	Dirty Water	Green Street	Resolved
21/06/2018	Leaking Meter	Brigalow Place	Resolved
21/06/2018	Leaking Meter	Campbell Street	Resolved
26/06/2018	No Water	Mt Hope	Resolved
26/06/2018	Water Meter Issues	Various	Resolved
29/06/2018	Leaking Water Meter	Rankin Street	Ongoing

b) Water Treatment Plant

There was a total of 3 plant faults within the water treatment facility in June, minor faults are excluded from this report. The main faults identified were:

Date	Description	Location	Status
06/06/2018	Alum controller and dehumidifier overload	Water Treatment Plant	Resolved
13/06/2018	Carbon pump not pumping and feed valve not opening	Water Treatment Plant	Resolved
14/06/2018	Southern saved water tank would not dump	Back Wash Facility	Pending

c) Pump Stations, Reservoirs and Reticulation

No faults were identified by the Council and recorded this month.

3. Plant Upgrades and Preventative Maintenance Programs

a) Water treatment plant

The usual day to day maintenance was undertaken on the water treatment plant. This included: turbidity meters recalibration, pH probe recalibration, chlorine display meter recalibration, intakes and rapid mixer pressure cleaning, Alum auger cleaning, Alum and Soda Ash hopper and discharge line clean outs, and carbon filter cleaning. Inspections of the 7Meg and Million Gallon Reservoirs were conducted.

b) Pump Stations and Reticulation

Flushing of the reticulation network at the junction of Linsley and Louth Street resulted in an extremely high turbid water discharge. It is suspected the cause is backflow of build-up along the reticulation caused by the operation of the 7Meg tank.

A pump station audit was conducted by JAC pumps including a risk assessment of potential failures.

Notes:
The 7 Meg tank pH levels averaged 8.36 for the month. The critical limit for pH is 8.5. Due to the proximity to the critical limit the pH will continue to be monitored.
